Chief Executive Officer

Company Secretary

Notes forming part of the financial statements

Note 1: Nature of operations

A2Z Waste Management (Ludhiana) Limited ('A2Z' or 'the Company' or 'SPV') is the wholly owned subsidiary of A2z Green Waste Management Limited. It was incorporated at National Capital Territory of Delhi and Haryana on July 14, 2011 for providing Waste Management Services.

The Company's main business primarily would include Door to door collection, intermediate transportation etc.

Note 2: Significant Accounting Policies

2.1 Basis of Accounting:

The financial statements of the Company have been prepared in accordance with the accounting standards notified under Companies (Accounting Standard) Rules, 2006 (as amended) and other relavent provisions of the Act.

In 2016 the Company has not applied any new accounting policies or made other retrospective changes that have a material effect on the statement of financial position as at 1 April 2015. Accordingly, the Company is not required to present a third statement of financial position as at that date. However, the Company has elected to provide this additional comparative information together with related notes as permitted by Ind AS 1 Presentation of Financial Statements'.

2.2 Foreign Currency Transactions:

The Company's financial statements are presented in INR, which is also the functional currency of the Company.

Foreign currency transactions are translated into the functional currency of the Company, using the exchange rates prevailing at the dates of the transactions (spot exchange rate).

Foreign exchange gains and losses resulting from the settlement of such transactions and from the remeasurement of monetary items denominated in foreign currency at year-end exchange rates are recognised in the Statement of Profit and Loss.

Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognised in Statement of Profit and Loss in the period in which they arise. When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss shall be recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in Statement of Profit and Loss, any exchange component of that gain or loss shall be recognised in the Statement

The financial statements of an integral foreign operation are translated as if the transactions of the foreign operation have been those of the Company itself.

2.3 Segment Reporting

2.3.1 Business segments

Operating Segments are identified based on financial information that is regularly reviewed by the chief operating decision maker (CODM) in deciding how to allocate resources and in assessing performance. The primary reporting of the Company has been performed on the basis of business segment. Segments have been identified and reported based on the nature of the products, the risks and returns, the organization structure and the internal financial reporting systems. The Company is operating into following segments – (i) Power generation projects

2.4 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Sales tax/ Value Added Tax [VAT] is not received by the Company on its own account. Rather, it is tax collected on value added to the Goods by the Company on behalf of the government. Accordingly, it is excluded from revenue.

The specific recognition criteria described below must also be met before revenue is recognised.

2.4.1 Revenue from Service Contracts:

Revenue from collection and transportation of municipal solid waste is accounted for when the services are rendered in terms of the contract entered with the local municipal bodies.

2.4.2 Revenue from sale of goods:

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the

Notes forming part of the financial statements

2.4.3 Interest Income:

Interest is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

2.4.4 Other Income:

Other income is recognised when no significant uncertainty as to its determination or realisation exists.

2.5 Borrowing Costs

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowing are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Statement of Profit and Loss over the period of the borrowings using the effective interest method.

General and specific borrowing costs that are directly attributable to the acquisition, construction or prodiction of a qualifying assets are capitalised during the period of time that is required to complete and prepare the asset for it's intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Other borrowing costs are expensed in the period in which they are incurred.

2.6 Other Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

All finite-lived intangible assets, including capitalised internally developed software, are accounted for using the cost model whereby capitalised costs are amortised on a straight-line basis over their estimated useful lives. Residual values and useful lives are reviewed at each reporting date. In addition, they are subject to impairment testing as described in Note 2.9. The following useful lives are applied:

• Software: 3-5 years

Amortisation has been included within depreciation, amortisation and impairment of nonfinancial assets.

Subsequent expenditures on the maintenance of computer software is expensed as incurred.

When an intangible asset is disposed of, the gain or loss on disposal is determined as the difference between the proceeds and the carrying amount of the asset, and is recognised in profit or loss within other income or other expenses.

2.7 Property, plant and equipment

Property, plant and equipment (comprising fittings and furniture) are initially recognised at acquisition cost or manufacturing cost, including any costs directly attributable to bringing the assets to the location and condition necessary for them to be capable of operating in the manner intended by the Company's management

Property, plant and equipment are subsequently measured at cost less accumulated depreciation and impairment losses.

Depreciation is recognised on a straight-line basis to write down the cost less estimated residual value of Property, plant and equipment. The following useful lives are applied:

• Buildings : 3-60 years

• Plant and Equipment: 8-15 years

Furniture and Fixtures : 8-10 years
 Vehicles : 6-10 years
 Office Equipment : 5 years

• Computers : 3-6 years

Material residual value estimates and estimates of useful life are updated as required, but at least annually.

Gains or losses arising on the disposal of Property, plant and equipment are determined as the difference between the disposal proceeds and the carrying amount of the assets and are recognised in profit or loss within other income or other expenses.

2.8 Leased Assets

2.8.1 Finance leases

Management applies judgment in considering the substance of a lease agreement and whether it transfers substantially all the risks and rewards incidental to ownership of the leased asset. Key factors considered include the length of the lease term in relation to the economic life of the asset, the present value of the minimum lease payments in relation to the asset's fair value, and whether the Company obtains ownership of the

For leases of land and buildings, the minimum lease payments are first allocated to each component based on the relative fair values of the respective lease interests. Each component is then evaluated separately for possible treatment as a finance lease, taking into consideration the fact that land normally has an indefinite economic life.

See Note 2.7 for the depreciation methods and useful lives for assets held under finance leases.

The interest element of lease payments is charged to profit or loss, as finance costs over the period of the lease.

2.8.2 Operating leases

All other leases are treated as operating leases. Where the Company is a lessee, payments on operating lease agreements are recognised as an expense on a straight-line basis over the lease term. Associated costs, such as maintenance and insurance, are expensed as incurred.

Notes forming part of the financial statements

2.9 Impairment testing of goodwill, other intangible assets and property, plant and equipment

For impairment assessment purposes, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level. Goodwill is allocated to those cash-generating units that are expected to benefit from synergies of a related business combination and represent the lowest level within the Company at which management monitors goodwill.

Cash-generating units to which goodwill has been allocated (determined by the Company's management as equivalent to its operating segments) are tested for impairment at least annually. All other individual assets or cash-generating units are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's (or cash-generating unit's) carrying amount exceeds its recoverable amount, which is the higher of fair value less costs of disposal and value-in-use. To determine the value-in-use, management estimates expected future cash flows from each cash-generating unit and determines a suitable discount rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Company's latest approved budget, adjusted as necessary to exclude the effects of future reorganisations and asset enhancements. Discount factors are determined individually for each cash-generating unit and reflect current market assessments of the time value of money and asset-specific risk factors.

Impairment losses for cash-generating units reduce first the carrying amount of any goodwill allocated to that cash-generating unit. Any remaining impairment loss is charged pro rata to the other assets in the cash-generating unit. With the exception of goodwill, all assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. An impairment loss is reversed if the asset's or cash-generating unit's recoverable amount exceeds its carrying amount.

2.10 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another

2.10.1 Initial recognition and measurement of financial instruments:

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. The company currently have security deposits, investment in preference shares of subsidiary companies, trade receivables, loans etc.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and subsequently all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or

2.10.2 Classification and Subsequent measurement of financial assets:

Financial assets are classified as subsequently measured at amortised cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL).

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- a) the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met and it is not designated as at FVTPL:
- a) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the All other financial assets are classified as measured at FVTPL. The Bank may designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. The Bank has not applied fair value designation option for any financial assets.

2.10.3 Impairment of financial assets:

In accordance with Ind AS 109, the Company applies expected credit loss [ECL] model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a. Financial assets that are debt instruments, and are measured at amortised cost e.g. security deposits
- b. Financial assets that are available for sale.
- c. Trade receivables or any contractual right to receive cash or another financial asset

The Company follows 'simplified approach' for recognition of impairment loss allowance on Point c provided above.

The application of simplified approach require the company to recognise the impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial

Notes forming part of the financial statements

The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive [i.e., all cash shortfalls], discounted at the original EIR. ECL impairment loss allowance [or reversal] recognized during the period is recognized as income/ expense in the Statement of Profit and Loss under the head 'other expenses'. The balance sheet presentation for various financial instruments is described below:

Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance reducing the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk

2.10.4 Classification and subsequent measurement of financial liabilities:

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss:

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the profit or loss. Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied for liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to the Statement of Profit and Loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through Statement of Profit Loans and borrowings:

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

2.10.5 Reclassification of financial instruments:

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses [including impairment gains or losses] or interest. The

2.10.6 Offsetting of financial instruments:

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities

2.11 Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- a. Raw Materials, Packing Material and Stores & Spare Parts: Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first-in-first-out basis.
- b. Finished Goods and Work-in-Progress: Cost includes cost of direct materials, labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on first-in-first-out basis.
- c. Stock-in-Trade: Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first-in-first-out basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.12 Income Taxes

Tax expense recognised in profit or loss comprises the sum of deferred tax and current tax not recognised in other comprehensive income or directly in equity.

Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Deferred income taxes are calculated using the liability method.

Deferred tax assets are recognised to the extent that it is probable that the underlying tax loss or deductible temporary difference will be utilised against future taxable income. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss or credit.

Notes forming part of the financial statements

2.13 Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term, highly liquid investments maturing within 90 days from the date of acquisition that are readily convertible into known amounts of cash and which are subject to an insignificant

2.14 Equity, reserves and dividend payments

Share capital represents the nominal (par) value of shares that have been issued.

Share premium includes any premiums received on issue of share capital. Any transaction costs associated with the issuing of shares are deducted from share premium, net of any related income tax benefits.

Other components of equity include the following:

- Remeasurement of net defined benefit liability Comprises the actuarial losses from changes in demographic and financial assumptions and the return on plan assets (see Note 2.15)
- Retained earnings includes all current and prior period retained profits and share-based employee remuneration. All transactions with owners of the parent are recorded separately within equity. Dividend distributions payable to equity shareholders are included in other liabilities when the dividends have been approved in a general meeting prior to the reporting date.

2.15 Post-employment benefits and short-term employee benefits

Post-employment benefit plans

The Company provides post-employment benefits through various defined contribution and defined benefit plans.

Defined Contribution Plans:

Retirement benefits in the form of provident fund and employee state insurance are defined contribution schemes and the contributions are charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due.

Defined Benefit Plans:

Gratuity liability is defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets, are recognised immediately in the Balance Sheet with a corresponding debit or credit to Retained Earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent **Leave Liability:**

The employees of the Company are entitled to leave as per the leave policy of the Company. The Company treats accumulated leave expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long term compensated absences are provided for based on actuarial valuation using the projected unit credit method at the year end. Actuarial gains/losses should be

Short-term employee benefits

Short-term employee benefits, including holiday entitlement, are current liabilities included in pension and other employee obligations, measured at the undiscounted amount that the Company expects to pay as a result of the unused entitlement.

2.16 Provisions, contingent assets and contingent liabilities

Provisions for product warranties, legal disputes, onerous contracts or other claims are recognised when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic resources will be required from the Company and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material.

Any reimbursement that the Company is virtually certain to collect from a third party with respect to the obligation is recognised as a separate asset. However, this asset may not exceed the amount of the related provision.

No liability is recognised if an outflow of economic resources as a result of present obligations is not probable. Such situations are disclosed as contingent liabilities unless the outflow of resources is remote.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate which reflects the current market assessment of time value of money. Government bond rate can be used as discount rate, as it is a riskfree pre-tax rate reflecting the time value of money. For this purpose, the discount rate should also be reassessed at the end of each reporting period, including the interim reporting

Notes forming part of the financial statements

2.17 Standards, not yet effective and have not been adopted early by the Company

Information on new standards, amendments and interpretations that are expected to be relevant to the financial statements is provided below.

Ind AS 115 'Revenue from Contracts with Customers' (Ind AS 115) alongwith changes in few other standards due to implementation

There is one new standard notified by MCA for revenue recognition which overhauls the existing revenue recognition standards including Ind

The new standard provides a control-based revenue recognition model and provides a five step application principle to be followed for revenue

- i. Identification of the contracts with the customer
- ii. Identification of the performance obligations in the contract
- iii. Determination of the transaction price
- iv. Allocation of transaction price to the performance obligations in the contract
- v. Recognition of revenue when performance obligation is satisfied.

The effective date of the new standard is 1st April 2018 as notified by the MCA. The management is yet to assess the impact of this new

2.18 Significant management judgement in applying accounting policies and estimation uncertainty Recognition of service revenues:

Determining when to recognise revenues from after-sales services requires an understanding of both the nature and timing of the services provided and the customers' pattern of consumption of those services, based on historical experience and knowledge of the market. (see Note Recognition of deferred tax assets:

The extent to which deferred tax assets can be recognised is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carry-forwards can be utilised. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions (see Note 2.12).

2.19 Estimation Uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Impairment of non-financial assets and goodwill

In assessing impairment, management estimates the recoverable amount of each asset or cash generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate (see Note 2.9).

Useful lives of depreciable assets

Management reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technological obsolescence that may change the utility of certain software and IT equipment.

Inventories

Management estimates the net realisable values of inventories, taking into account the most eliable evidence available at each reporting date. The future realisation of these inventories may be affected by future technology or other market-driven changes that may reduce future selling

Construction contract revenue

Recognised amounts of construction contract revenues and related receivables reflect management's best estimate of each contract's outcome and stage of completion. For more complex contracts in particular, costs to complete and contract profitability are subject to significant estimation uncertainty (see Note 2.4).

Defined benefit obligation (DBO)

Management's estimate of the DBO is based on a number of critical underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

Fair value measurement

Management uses valuation techniques to determine the fair value of financial instruments (where active market quotes are not available) and non-financial assets. This involves developing estimates and assumptions consistent with how market participants would price the instrument. Management bases its assumptions on observable data as far as possible but this is not always available. In that case management uses the best information available. Estimated fair values may vary from the actual prices that would be achieved in an arm's length transaction

Notes forming part of the financial statements (Unless otherwise stated, all amounts are in INR lacs)

For the year ended March 31, 2018 March 31, 2017

Note 30 : EPS

Earnings per share and dividends

Earnings per share

Both the basic and diluted earnings per share have been calculated using the profit attributable to shareholders of the Company as the numerator, ie no adjustments to profit were necessary in 2015 or 2016.

The reconciliation of the weighted average number of shares for the purposes of diluted earnings per share to the weighted average number of ordinary shares used in the calculation of basic earnings per share is as follows:

Particulars		Balance as on 31 March 2018	Balance as on 31 March 2017
Weighted average number of shares used in basic earnings per share		50,000	50,000
Shares deemed to be issued for no consideration in respect of share-based	payments		-
Weighted average number of shares used in diluted earnings per sha	re	50,000	50,000
The numerators and denominators used to calculate the basic and diluted E		(272.15)	(170, 47)
Profit attributable to Shareholders	INR in Lcs	(273.15)	(170.47)
Basic and weighted average number of Equity shares outstanding dur	0 ,	50,000	50,000
Nominal value of equity share	INR	10.00	10.00
Basic & Diluted EPS	INR	(546.30)	(340.91)

Notes forming part of the financial statements

(Unless otherwise stated, all amounts are in INR lacs)

31 Employee benefits

Defined Contribution Plan

The Company's contribution towards the defined contribution plan

The Company makes Provident Fund contributions to defined contribution retirement benefit plans for qualifying employees, as specified under the law. The contributions are paid to the Provident Fund Trust set up by the Company or to the respective Regional Provident Fund Commissioner under the Pension Scheme. The Company is generally liable for annual contribution and any shortfall in the trust fund assets based on the government specified minimum rate of return and recognises such contribution and shortfall, if any, as an expense in the year it is incurred.

The Company has also certain defined contribution plans. The contributions are made to providend fund in India for employees at the rate of 12% of the basis salary as per regulations. The contribution are made to registered providend fund administered by the government. The obligation of the Company is limited to the amount contributed and it has no further contractual nor any constructive obligation the expense recognised during the period towards the defined contribution plan is INR 3.36lacs (Previous year: INR 2.26lacs)

Gratuity

The Company provides for the gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service of five years are eligible to gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportonately for 15 days salary multiplied for the number of years of service.

A reconciliation of the Company's defined benefit obligation (DBO) and plan assets to the amounts presented in the statement of financial position for each of the reporting periods is presented below:

rticulars As o		on
	31-Mar-18	31-Mar-17

Components of defined benefit costs recognised in other comprehensive income	(1.38)	0.12

Financial Assumptions

The principal financial assumptions used in the valuation are shown in the table below:

Particulars	As	on
	31-Mar-18	31-Mar-17
Discount rate (per annum)	7.80%	7.40%
Salary growth rate (per annum)	5.00%	5.00%

Demographic Assumptions

Particulars Particulars	As	on
	31-Mar-18	31-Mar-17
Mortality Rate (% of IALM 06-08)	100.00%	100.00%
Attrition/Withdrawal rates	2.00%	2.00%

These assumptions were developed by management with the assistance of independent actuaries. Discount factors are determined close to each year-end by reference to market yields of high quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related pension obligation. Other assumptions are based on current actuarial benchmarks and management's historical experience.

Sensitivity Analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discountrate, expected salary increase and mortality. The sensitivity analysis below have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant. The results of sensitivity analysis is given below:

Particulars	31-Mar-18	31-Mar-17
Defined Benefit Obligation (Base)	11.49	9.40

Notes forming part of the financial statements

(Unless otherwise stated, all amounts are in INR lacs)

Particulars	31-Ma	31-Mar-18		r-17
	Decrease	Increase	Decrease	Increase
Discount Rate (- / + 1%)	13.00	10.23	10.74	8.28
(% change compared to base due to sensitivity)	13.10%	-11.00%	14.30%	-11.90%
Salary Growth Rate (- / + 1%)	10.19	13.03	8.25	10.76
(% change compared to base due to sensitivity	-11.40%	13.40%	-12.20%	14.50%
Attrition Rate (- / + 50%)	11.16	11.78	9.15	9.60
(% change compared to base due to sensitivity)	-2.90%	2.50%	-2.60%	2.20%
Mortality Rate (- / + 10%)	11.48	11.50	9.39	9.40
(% change compared to base due to sensitivity)	-0.10%	0.10%	-0.10%	0.10%

Please note that the sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

There is no change in the method of valuation for the prior period. For change in assumptions please refer to section 5 above, where assumptions for prior period, if applicable, are given.

Maturity Analysis

There is no change in the method of valuation for the prior period. For change in assumptions please refer to section 5 above, where assumptions for prior period, if applicable, are given.

	1 year	2 to 5 years	6 to 10 years	More than 10 years	Total

Note 33: Financial risk management

(i) Fair value maesurement of financial instruments

Financial assets and financial liabilities measured at fair value in the statement of financial position are Companyed into three Levels of a **Level 1:** Quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

(i) Financial Instruments by Category

For amortised cost instruments, carrying value represents the best estimate of fair value.

The Company's risk management is carried out by a central treasury department (of the company) under policies approved by the board of directors. The board of directors provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

A. Credit risk

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company. The. Credit risk arises from cash and cash equivalents, trade receivables, investments carried at amortised cost and deposits with banks and financial institutions. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at the reporting date, as summarised below:

The Company continuously monitors defaults of customers and other counterparties, identified either individually or by the Company, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Company's policy is to deal only with creditworthy counterparties.

The Company's receivables comprises of trade receivables. During the periods presented, the Company made no write-offs of trade receivables and it does not expect to receive future cash flows or recoveries from collection of cash flows previously written off. The Company has certain trade receivables that have not been settled by the contractual due date but are not considered to be impaired, as given below:

	INR	
	As at	
	31-Mar-18	31-Mar-17
Not more than 30 days	159.20	156.71
More than 30 days but not more than 60 days	163.55	151.32
More than 60 days but not more than 90 days	173.23	213.58
More than 90 days	398.21	80.98
	894.19	602.60

In respect of trade and other receivables, the Company is not exposed to any significant credit risk exposure to any single counterparty or any Company of counterparties having similar characteristics. Trade receivables consist of a large number of customers in various industries and geographical areas. Based on historical information about customer default rates management consider the credit quality of trade receivables that are not past due or impaired to be good.

The credit risk for cash and cash equivalents, mutual funds, and derivate financial instruments is considered negligible, since the counterparties are reputable organisations with high quality external credit ratings.

B. Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Company maintains flexibility in funding by maintaining availability under committed facilities.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

March 31, 2018	Less than 1 year	1-2 year	2-3 year	More than 3 years	Total
Non-derivatives				•	
Borrowings	34.63	-	-	2,047	2,081.80
Trade payables	1,207.32	-	-	-	1,207.32
Other financial liabilites	1,106.28	-	-	-	1,106.28
Total	2,348.23	-	-	2,047.17	4,395.40

March 31, 2017	Less than 1 year	1-2 year	2-3 year	More than 3 years	Total
Non-derivatives					
Borrowings	43.39	-	-	2,047	2,090.56
Trade payables	651.28	-	-	-	651.28
Other financial liabilites	1,543.59	-	-	-	1,543.59
Total	2,238.26	-	-	2,047.17	4,285.44

Market Risk

(a) Interest rate risk

Liabilities

The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. At 31 March 2018, the Company is exposed to changes in market interest rates through bank borrowings at variable interest rates. The Company's investments in Fixed Deposits all pay fixed interest rates.

Interest rate risk exposure

Below is the overall exposure of the Company to interest rate risk:

Particulars	31-Mar-18	31-Mar-17
Variable rate borrowing	-	-
Fixed rate borrowing	472.38	427.94
Total borrowings	472.38	427.94

Sensitivity

Below is the sensitivity of profit or loss and equity changes in interest rates.

Particulars	March 31, 2018	March 31, 2017
Interest sensitivity*		
Interest rates – increase by 100 basis points (100 bps)	4.72	4.28
Interest rates – decrease by 100 basis points (100 bps)	(4.72)	(4.28)

^{*} Holding all other variables constant

Temparory Differences on which deffered tax not created						
Expense on which TDS not deposited	0.98	0.25	Not applicable			
Provision for gratuity and leave encashment	4.02	1.03	Not applicable			
Depreciation	35.33	9.10	Not applicable			
	304.27	78.35		199.23	51.30	

Note 35: Capital Management Policies and Procedures

For the purpose of the Company's capital management, capital includes issued equity capital, convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the Company.

The Company's capital management objectives are:

- to ensure the Company's ability to continue as a going concern
- to provide an adequate return to shareholders

by pricing products and services commensurately with the level of risk.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the equirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep the gearing ratio between 20% and 40%. The Company includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and cash equivalents, excluding discontinued operations.

	31-Mar-18	31-Mar-17
Borrowings	472.38	427.94
Trade payables	1,207.32	651.28
Other financial liabilities	1,106.28	1,563.95
Less: cash and cash equivalents	172.88	541.10
Net debt	2,613.10	2,102.06
Equity	932.11	1,203.87
Capital and net debt	3,545.22	3,305.93
Gearing ratio	74%	64%

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

Note 36: Contingent liability and commitments outstanding:

a) Contingent Liabilities:		
Particulars	31-Mar-18	March 31, 2017
Preference Dividend	0.0	0.00
Total	0.0	0.00

b) Commitments outstanding:

Estimated amount of contracts to be executed and not provided for:

Estimated amount of contracts to be executed and not provided for:		
Particulars	31-Mar-18	March 31, 2017
Capital commitments	456.85	1,192.55
Total	456.85	1,192.55

Note 37: Post-reporting date events

No adjusting or significant non-adjusting events have occurred between the 31 March reporting date and the date of authorisation.

Note 38: Authorisation of financial statements
The Financial statements for the year ended 31 March 2018 (including comparatives) were approved by the board of directors on 25-May-2018
